COURIERS

CONBIERS

Travel M Couriers is an innovative solution that helps people to get the items they need and helps businesses to reach a wider audience. Our service embraces technology and utilizes our extensive resources to ensure the highest quality and best value. We offer same-day delivery services that change the way our customers receive anything from fresh food to household furniture. At its heart, Travel M Couriers is rooted in the idea that through professionalism and a forward-thinking business model, we can revolutionize the same-day delivery industry for both customers and business.

Our History and Our Vision

Travel M Couriers was born out of experience and innovation. Our founder, Ashton Samuel, grew up in the industry. As a young boy, he worked alongside his father providing courier service throughout the U.K. After learning everything he could, Ashton began working independently in the field developing extensive experience and a strong sense of what works and what doesn't. This knowledge and experience led him to create Travel M Couriers as a bold new approach.

Our vision is to revolutionize same-day delivery in the same way Lyft and Uber revolutionized transit. By incorporating advanced technology with an easy-to-use app, we make superior service accessible to everyone. This, in turn, grows the customer base of many businesses, helps to stimulate the economy, and creates jobs. Ultimately, Travel M Couriers is a modern delivery solution with a strong vision for the future.

HOW WE HELP CUSTOMERS?

Travel M Couriers prides itself on unmatched customer service. We achieve this through our approach which centres on speed, simplicity, and reliability. Scheduling pick-up and delivery is fast and easy through our app. We guarantee items will be collected within 90 minutes of booking and delivered nationwide on the same day. For added convenience, we employ a range of delivery vehicles ranging from bike to 3.5-ton van to meet a variety of needs. Furthermore, whether our customers' items are big or small, we provide superb care and make it easy to follow with live tracking right on the app.

The modern customer is unforgiving – one bad delivery can damage a brand

High Expectations

Same Day Delivery

Expected to reach a 25% market share by 2025

Adding carriers for faster delivery will become unsustainable

Environmental Strategy

Industry Partnerships

Real-Time Transparency

Customers can tolerate a late delivery if they're notified in advance

More storefronts turned to mini DCs offer faster shipping

Fulfillment Hubs

Agile Operations

Quick decision making will be essential to the survival of e-commerce businesses

HOW WE HELP BUSINESSES

The way people do business has changed a lot over the years and it continues to change today. To build a large customer base, a company must focus on connecting with people who expect convenience at their fingertips. The world is more connected than ever through the internet and mobile apps. Our service uses technology to help businesses reach a nationwide audience. We understand the needs of business and we understand the expectations of customers. Today's customers are unforgiving and a single missed delivery or one bad experience can do a great deal of damage to a business's reputation. By guaranteeing our deliveries, including live tracking, and providing courier contact information to easily make changes, we ensure that customers never have a negative delivery experience
